Key documents relevant to LDF and SA	Objectives relevant to LDF and SA	Implications for document	Implications for SA
	<p>1.10 Encourage and support a culture of enterprise and innovation, including social enterprise</p> <p>1.11 Achieve a strong, stable and sustainable economy and prosperity for the benefit of all the Region's inhabitants</p> <p>2.1 Reduce overall energy use through increased energy efficiency</p> <p>2.2 Increase the proportion of energy generated from renewable and low carbon sources, including by micro-generation, CHP, Council area heating, and in transportation</p> <p>2.3 Minimise the Region's contribution to the causes of climate change by reducing emissions of greenhouse gases from transport, domestic, commercial and industrial sources</p> <p>2.4 Implement a managed response to the unavoidable impacts of climate change, ensuring that the design and planning process takes into account predicted changes in the Region's climate</p> <p>2.5 Land use and development that takes into account predicted changes in the Region's climate including flood risk</p> <p>3.1 Value, protect, enhance and restore the Region's environmental assets, including the natural, built and historic environment and landscape</p> <p>3.2 Value, maintain, restore and re-create regional biodiversity, where possible using approaches that improve the resilience of natural systems such as linking fragmented habitats</p> <p>3.3 Minimise air, water, soil, light and noise pollution levels and create good quality air, water and soils</p> <p>3.4 Encourage land use and development that optimises the use of previously developed land and buildings</p> <p>3.5 Encourage land use and development that creates and sustains well-designed, high quality built environments that incorporate green space, encourage biodiversity, and promote local distinctiveness and sense of place</p> <p>3.6 Encourage local stewardship of local environments, for example by promoting best practice in agricultural management or enabling communities to improve their neighbourhoods</p> <p>3.7 Promote environmental justice, recognising that deprived areas and disadvantaged communities are more likely to be affected by environmental damage and degradation</p> <p>4.1 Enable communities to influence the decisions that affect their neighbourhoods and quality of life</p> <p>4.2 Ensure easy and equitable access to services, facilities and opportunities, including jobs and learning, and that people are not disadvantaged with regard to ethnicity, gender, age, disability, faith, sexuality, background or location</p> <p>4.3 Address poverty and disadvantage, taking into account the particular difficulties of those facing multiple disadvantage</p> <p>4.4 Improve health and reduce health inequalities by encouraging and enabling healthy active lifestyles and protecting health, as well as providing equitable access to health services</p>		

5 Appendix E - Relevant Plans and Programmes

Key documents relevant to LDF and SA	Objectives relevant to LDF and SA	Implications for document	Implications for SA
	<p>4.5 Provide decent and affordable housing for all, of the right quantity, type, tenure and affordability to meet local needs, in clean, safe and pleasant local environments</p> <p>4.6 Reduce crime, fear of crime and antisocial behaviour</p> <p>4.7 Improve opportunities to participate in the diverse cultural, sport and recreational opportunities the West Midlands can offer locally and in the wider region</p> <p>4.8 Encourage physical development with a better balance of jobs, housing, social and cultural services and amenities within each part of the Region in order to meet local needs locally and encourage stable and sustainable communities</p> <p>4.9 Ensure that the Region's workforce is equipped with the skills to access high quality employment opportunities suited to the changing needs of the Regional economy, whilst recognising the value and contribution of unpaid work</p> <p>4.10 Promote investment in future prosperity, including ongoing investment and engagement in learning and skills development</p>		
<p>Sustainable Communities in the West Midlands: Building for the Future</p>	<p>Urban Renaissance – developing the major urban areas in such a way that they increasingly meet their own economic and social needs, countering the unsustainable outward drift of people and jobs</p> <p>Rural Renaissance – addressing more effectively the changes which are challenging the traditional roles of rural areas.</p> <p>Diversifying and modernising the region's economy - ensuring that opportunities for growth are linked to meeting needs and that they help reduce social exclusion.</p> <p>Modernising the transport infrastructure of the region – to support the sustainable development of the West Midlands.</p>	<p>Incorporate implications into Housing policies in Core Strategy and Design SPD</p>	<p>Ensure themes are transferred into SA</p>
<p>The Regional Energy Strategy 2004</p>	<p>Improving Energy Efficiency - Using less energy will reduce emissions of greenhouse gases. Crucially, this need not be at the expense of our standard of living. This objective concerns both reducing the need for energy (for example, by designing houses that need less heating), and improving the efficiency with which it is used (for example, through more efficient boilers and better insulation). We aim to make the West Midlands an example of best practice that the rest of the country can follow.</p> <p>Increasing the use of Renewable Energy Resources - Energy from renewable sources produces practically no net emissions compared with energy from fossil fuels such as gas and oil. Technological priorities and targets for installing renewable energy plants and systems need to be chosen to reflect the availability of resources in the West Midlands, suitability of the different technologies to meet the region's needs and their relative cost.</p> <p>Maximising Uptake of Business Opportunities - By becoming more energy efficient, businesses can improve their profitability. In addition, excellent business opportunities are emerging as a result of changes in the patterns of energy production, distribution and use. To help businesses take full advantage of these, the quality and effectiveness of business support needs to be improved. Harnessing research and development and innovation skills in the region will also be an important factor here.</p> <p>Ensuring Focused and Integrated Delivery and Implementation - Regional and local agencies have powers to directly influence patterns of energy use, for example through planning control, construction of new buildings, vehicle fleets and energy purchasing. Such decisions also give signals to the energy market, for example by favouring certain technologies and approaches. The aim of the Strategy is therefore to ensure that these direct influences and signals are correct and consistent. Regional organisations will need to provide the leadership and funding required</p>	<p>Develop plan policies that reflect the objectives of the Regional Energy Strategy, and improve energy efficiency.</p>	<p>Ensure wording of sustainability objectives cover relevant Regional Energy Strategy objectives, such as improving energy efficiency and increasing the use of renewable energy resources.</p>

5 Appendix E - Relevant Plans and Programmes

Key documents relevant to LDF and SA	Objectives relevant to LDF and SA	Implications for document	Implications for SA
<p>Regional Forestry Framework 2004</p>	<p>for its effective delivery. A number of existing mechanisms and programmes are designed to reduce energy use. Part of the Strategy's role is to influence these to ensure that they provide a good match to the region's specific needs. This Strategy also has a role to play in enabling the flow of regional views on national energy policy to central Government.</p> <p>Illustrate how regional woodland cover may evolve over several decades, helping to deliver new woodlands and manage existing (under the Regional Spatial Strategy and according to the Framework vision) and to enhance the quality of life in the region.</p> <p>Provide a spatial context for the development of woodland and forestry in the region and contribute to urban and rural renaissance through the regional planning process.</p> <ul style="list-style-type: none"> _ Chart and facilitate an economically viable woodland and forestry sector that is able to deliver the Framework vision and help improve household incomes in rural areas. _ Make clear the relevance of woodland and forestry to people's everyday needs involving local communities wherever possible. _ See a significant increase in the activity of the woodland and forestry sector and its contribution in urban and rural areas and help achieve relevant Public Service Agreement targets. _ Strengthen urban-rural links and see woodland and forestry more successfully embedded in wider urban and rural agendas, particularly in urban fringe areas. _ Improve understanding of regional woodland and forestry at strategic levels and within regional structures so that the woodland and forestry sector can make an effective contribution to other regional policies, delivery plans, joined-up agendas and actions. _ Illustrate good practice in sustainable development processes by minimising the ecological footprint and by demonstrating: how the woodland and forestry sector can make significant contributions and maximise benefits to health, recreation, recycling, renewable energy, urban and rural regeneration and biodiversity conservation; why health and leisure sectors should engage with and invest in woodland and forestry. 	<p>Develop plan policies that consider the objectives of the Regional Forestry Framework.</p>	<p>Ensure that wording of the SA indicators/objectives consider relevant Regional Forestry Framework objectives.</p>
<p>The Regional Rural Development Framework 2006</p>	<p>Enhancing the value of the countryside</p> <p>Developing a diverse and dynamic business base</p> <p>Learning and skills improved</p> <p>Creating the conditions for growth</p> <p>Achieving fair access to services for all</p> <p>Securing vibrant, active, inclusive and sustainable communities</p>	<p>Develop plan policies that consider the objectives of the Regional Rural Development Framework and recognise the value of the countryside.</p>	<p>Ensure that wording of the SA indicators/objectives consider relevant Regional Development Framework objectives.</p>
<p>The Regional Water Resources Strategy 2005</p>	<p>Our strategy incorporates a number of principles underpinning the Agency's approach to water resources planning:</p> <ul style="list-style-type: none"> • prudent and sustainable use of natural resources 	<p>Develop plan policies that have regard to the objectives of the</p>	<p>Ensure that the wording of the SA report consider</p>

REGIONAL GOVERNING BODIES OF PRIORITY SPORTS TO BE SUPPORTED TO DELIVER A CLEAR FRAMEWORK FOR TALENT IDENTIFICATION AND PERFORMANCE DEVELOPMENT AS PART OF THEIR REGIONAL PLAN 12. THE MAIN ACTIONS TO BE AGREED WITH PARTNERS THROUGHOUT THE REGION, TO DEVELOP AND DELIVER PLANS TO WIDEN ACCESS TO SPORT AND PHYSICAL ACTIVITY FOR PRIORITY OR DISADVANTAGED GROUPS 13. A SUB-GROUP OF THE GOVERNMENT OFFICE WEST MIDLANDS REGIONAL BOARD TO BE SET UP, TO COORDINATE POLICY AND ACTIONS IN HEALTH, PHYSICAL ACTIVITY AND SPORT IN THE REGION 14. THE IMPORTANCE OF SPORT TO BE RECOGNISED WITHIN THE DEVELOPMENT PLANS OF CHILDREN'S TRUSTS, CRIME REDUCTION PARTNERSHIPS AND OTHER ORGANISATIONS WHICH USE SPORT FOR SOCIAL AND COMMUNITY BENEFITS 15. TO ACHIEVE THE JOINT DFES/DCMS PSA TARGET, TO ENHANCE THE TAKE UP OF SPORTING OPPORTUNITIES BY 5-16 YEAR OLDS BY INCREASING TO 75% THE PERCENTAGE OF SCHOOLCHILDREN SPENDING AT LEAST 2 HOURS A WEEK ON HIGH QUALITY PE & SCHOOL SPORT, WITHIN AND BEYOND THE CURRICULUM, BY 2006 16. THE BENEFITS OF AN ACTIVE WORKFORCE IN THE WEST MIDLANDS TO BE RESEARCHED AND THE FINDINGS USED TO ENCOURAGE THE PROMOTION OF ACTIVE WORK PLACES 		
LOCAL			
Telford and Wrekin Community Strategy 2006	<ul style="list-style-type: none"> • Priority 1: Transforming Telford & Wrekin - Our focus is on putting in place the key elements of the physical infrastructure needed to accommodate sustainable further population and employment growth, attract additional and secure existing investment, and bring about the sustainable regeneration of the area's more deprived residential and industrial areas. • Priority 2: Children & Young People - Our focus is on the five key outcomes for children and young people as set out in the Children Act 2004, which brings together the educational, social and health needs of all young people, and provides the framework for delivering on the national primary and secondary school strategies to transform children's achievements at school. • Priority 3: A Sustainable and Quality Environment - Our focus is on managing the growing pressures on the local environment, through reducing and recycling waste, providing viable alternative transport solutions to the car, creating quality public space, and conserving and enhancing the Council area's unique environment. 	Ensure that policies consider the objectives of the Community Strategy, for example, community cohesiveness and a sustainable environment.	Ensure wording of sustainability objectives covers relevant Community Strategy objectives.

5 Appendix E - Relevant Plans and Programmes

Key documents relevant to LDF and SA	Objectives relevant to LDF and SA	Implications for document	Implications for SA
	<ul style="list-style-type: none"> • Priority 4: Safe, Strong and Cohesive Community - Our focus is on reducing key crimes, criminal damage and anti-social behaviour, and through this people's fear and perception of crime. There will be a particular focus on reducing the harm caused by alcohol and drugs, and their impact on communities. Strengthening communities by building capacity, celebrating and recognising diversity, promoting equalities, and encouraging co-production will be driven through the development of neighbourhood working across the Council area and investment in the community and voluntary infrastructure, in particular the Council for Voluntary Service and the Race, Equality & Diversity Partnership. • Priority 5: Healthier Communities and Vulnerable People - Our focus is on prevention and supporting people to manage their lives and meet their health needs where possible within the community. Improving people's health and reducing inequalities in health, as well as treating illness, will improve the overall well being of the community. Adult health and social care services will provide greater informed choice for service users and improve their access to community services, especially for older people and those who are most vulnerable. • Priority 6: Local Economy & Skills - Whilst investment in the physical and economic infrastructure of the Council area (Priority 1) will help create the necessary conditions for diversifying the local economy and encouraging higher value-added employment growth, this will need to be complemented by a focus on the promotion and support of new and existing businesses, and playing a key role in the growth of the wider regional economy. Ensuring that local people have the required levels of training and skills to successfully compete for jobs, meet the demands of employers for increasingly higher level skills or create new businesses themselves, will also be critical to the future success of the local economy. 		
Local Transport Plan 2006-2011	<ul style="list-style-type: none"> • To combat social exclusion and maximise accessibility to everyday facilities for all • To support sustainable economic growth and regeneration • To limit the growth of traffic pollution, whilst encouraging development • To improve safety for all • To protect and enhance the built and natural environment 	Develop plan policies that reflect objectives of the Local Transport Plan.	SA to reflect Local Transport Plan objectives, through wording of objectives.
Sport and Recreation Strategy for Telford and Wrekin 2002 – 2011	<ul style="list-style-type: none"> • Ensure service provision reflects policies as determined by the local authority • Increase community participation in the formulation of strategic plans for Sport and Recreation • Provide a proactive framework for current and future provision involving the Public, Voluntary and Private sector • Rationalise the Councils allocation of resources associated with such provision • Provide guidance for management decisions • Decide on proposals for the development arising from planning applications relating to Sport and Recreations facilities • Provide a framework for the procurement of suitable sites for Sports and Recreation provision, and the release of sites no longer relevant to current and future needs • Identify key Sports and Recreation issues to enable Telford and Wrekin as the local authority decide and implement policy relating to Sport and Recreation 	Incorporate into all sport and recreation sections and policies of the plan	Ensure that wording of relevant SA indicators/objectives cover the aims of the Sport and Recreation Strategy for Telford.

PN = Potentially Negative: Where the Plan objective conflicts with the sustainability objective. Recommendations for changing the Plan objective are made

PP = Potentially Positive: Plan objectives may be sustainable given certain provisos (see report)

NE = Neutral: There is no relationship between the plan objectives & SA objectives / the plan objective has both Negative & positive outcomes which balance

PC = Positive Compatible: The Plan objective supports the sustainability objective & no changes are required

U = Unknown at this time: There is insufficient information available to appraise the objective

To address the causes of climate change through reducing greenhouse gas emissions

To reduce the risk of flooding

To protect and enhance the availability and quality of water resources

To reduce air pollution and ensure that air quality continues to improve

To reduce noise and light pollution

To reduce contamination and safeguard soil quality and quantity

To increase energy efficiency and increase the use of renewable energy

To reduce the generation of waste and maximise re-use and recycling

To promote the use of resources efficiently, as well as sustainably sourced products and re-used and recycled products
