

## 1.1. MALINSLEE

### OVERVIEW

- Located in south Telford, Malinslee underwent little change in the number of households between 1991 and 2001, however, over the same period the population declined by 616 people or -9.3%.
- The age structure of the ward's population was found to be relatively young with some 25.6% of the population being aged 15 years or less, compared with 22.3% Borough-wide.
- Some 12.2% of households were lone parent households, the third highest ward rate in the Borough.
- Malinslee had the highest ward rate in the Borough for households that rented their home from a social landlord, 45.9%.
- Compared to the Borough as a whole, Malinslee had a low proportion of dwelling stock that was detached - 14.5% compared with 30.6%. Conversely, some 39.6% of dwellings were terraced, the fifth highest ward rate in the Borough.
- More than a third of households, 35.9%, did not have access to a car – the third highest ward rate in the Borough.
- At 61.6%, Malinslee had the fourth lowest economic activity rate in the Borough. The ward had the second highest unemployment rate in the Borough, 8.4%.
- The ward had the fourth highest ward rate for residents employed in manufacturing, 31.9%, but the second lowest ward rate for residents employed in public services, 16.1%.
- At 44.5%, the ward had the second highest ward rate in the Borough for people without any educational qualifications.
- Some 21.7% of the population were found to have a long-term illness, the fourth highest ward rate in the Borough.

Total	9.9	608	10.2

## EXPLANATORY NOTES

### The Census

The 2001 Census was carried out on the 29<sup>th</sup> April. As the response rate was 94.2% in the Borough, it was necessary for the Office for National Statistics (ONS) to impute missing responses. **All data from the Census are therefore estimates and subject to standard error.**

In order to monitor local trends, 1991 Census data has been modelled to 2001 ward boundaries. Whilst every effort has been made to ensure that this exercise produces accurate results, it must be remembered that at best the 1991 data included in this report are estimates.

Due to rounding, table columns in this document may not sum to the presented total.

### Migration

A migrant is defined as a person with a different address one year before the Census to that on Census Day.

### Ethnicity

The 2001 Census was the first Census to use the "mixed" ethnicity response.

### Dependent Children

A dependent child is a person in a household aged 0-15 years (whether or not in a family) or a person aged 16-18 who is a full-time student and in a family with parents

### Economic Activity

The economically active population is more usually defined as all people aged 16+ who are either full or part time employees, self employed, unemployed or a full time student who is working. To date, ONS have only published data for 16-74 year olds, excluding residents who are 75+ and economically active. It has not been possible to produce ward based estimates of the economically active population from the 1991 Census which excludes those who are aged 75+. However, the percentage of economically active people

who were aged 75+ in the 1991 Census was less than 0.13%.

### Economic Dependency Ratio

The economic dependency ratio is the ratio between people of working age, 16 to 65, and the rest of the population. A high rate indicates that there are disproportionately more people not of working age in a population than working age.

### Unemployment Rate

The Census definition of unemployment is broader and therefore produces a higher unemployment rate than the measure normally used by ONS (residents claiming Job Seekers Allowance).

### Long-term Limiting Illness

An illness, health problem or disability which limits daily activities or the work a person can do.
