# Education, Skills & Training

The Education, Skills and Training domain measures the lack of attainment and skills in the local population. The indicators fall into two sub-domains; one relating to children and young people and one relating to adult skills. These two sub-domains are designed to reflect the 'flow' and 'stock' of educational disadvantage within an area respectively. That is the 'children and young people' sub-domain measures the attainment of qualifications and associated measures ('flow'), while the 'skills' sub-domain measure the lack of qualifications in the resident working-age adult population ('stock')
