

In the above drawing the length of the front of the building is 14.400 m with a depth of 3.000 m from the front. For ease I have drawn out the floor slabs to help you carry out your due diligence. 5 (5 x 0.600 = 3m) slabs by 24 (24 x 0.600=14.4m).

The tables and chairs have been illustrated on the plan in brown.
