

Health and Care
ONE RECORD FOR BETTER HEALTH AND CARE

Safely sharing care records for people living in Shropshire, Telford and Wrekin

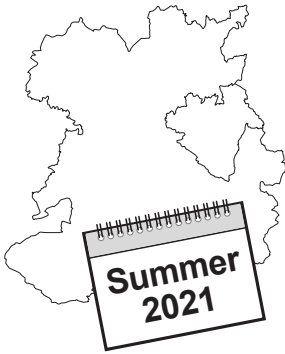

Lots of different people like doctors, nurses and social care workers can be involved in your care, but they each have their own set of information about you.

It's important that the people who are caring for you have up-to-date information about you, like:

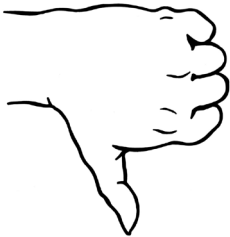

- Your contact details
- Current and previous conditions
- Medications and allergies
- Clinics and services you have been to
- Referrals and discharges
- Social and mental health information and care plans.

If your GP is in Shropshire or Telford and Wrekin, this information will be available to the people who care for you from summer 2021. Staffordshire and Stoke-on-Trent started using this last year.

One Health and Care is a single digital shared care record which will help us to provide you with better, safer care.

If you do not want your details to be shared in this way, contact your GP or email **shropcom.dataprotection@nhs.net**.
