

## Statement of Reasons

### TELFORD & WREKIN COUNCIL VARIOUS ROADS, WROCKWARDINE (20MPH, 30MPH & 40MPH) ORDER 2021

---

#### Proposals

**It is proposed to introduce 20mph, 30mph & 40mph speed limits on various roads in Wrockwardine.**

The issue of safety and speed throughout this area has been discussed with the Parish Council, Ward Members and the local residents regarding the 20mph, 30mph and 40mph speed limits. We have also had discussions around the new residential developments in the local area and how that may impact the current speed restrictions in place.

It was determined that the speed limit reduction would supplement the physical traffic calming measures being installed as part of the development programme within the area.

Following a review of the existing speed limit and the previous Order relating to this restriction, it was established that the Order needed to be revised to fully reflect the existing restrictions on site.

#### **Road Traffic Regulation Act 1984**

In deciding to introduce this speed limit the Council have had regard to the duty set out in s.122 of the Road Traffic Regulation Act 1984 to secure the expeditious, convenient and safe movement of vehicular and other traffic (including pedestrians).
