

Introducing Grofar – our new Work Placement management platform

We have an on-going commitment to ensuring that all our students have access to high-quality Work Experience Placements and have introduced Grofar, an innovative new digital platform to help manage Work Placements, at the school.

Grofar helps the school set up, track and report on students' Work Experience Placements, while also providing our students with an online application that allows them to quickly and easily enter their hours and experiences whilst out on placement.

Software Features

Management & Tracking

Accurate and up-to-date placement tracking through the intuitive portal saves your staff time, ensures you know where your students are and provides all the information you need for reporting and funding.

Business Engagement

Easily manage contacts, H&S information and opportunities through informative email templates and simple e-forms. Build your network of employers using the online registration forms you can share by email or host on your website.

Student Mobile App

Engaging digital logbook for students to manage their placements, action plans, targets, and log hours and experience at the touch of a button.

Placement Matching

Ensure students have access to meaningful placements with a comprehensive database of work placement opportunities to match with students' needs.

Risk Assessments

Comprehensive health & safety & insurance checks are managed through simple online forms. Placement providers can complete assessments online and upload relevant documents.

Work Readiness Assessments

Students complete simple online work readiness and skills assessments at different stages of the placement to assess improvement in skills development.

Placement Assessments

Start, Midpoint and Endpoint assessments ensure student receive quality placements. Student and employers complete feedback forms for evaluation.

MIS, CRM and Learner Record Integration

Complete integration with college MIS, CRM, Learner Record and Reporting systems ensures all existing systems are joined up. Single Sign-on enables staff and students to use existing college logins.
