1 EXECUTIVE SUMMARY

The 2010 Index of Multiple Deprivation (IMD) ranks ‘neighbourhood areas’ or SOAs (Super Output Areas) across England by their level of deprivation based upon 37 key indicators across seven domains. The 2010 IMD uses the same methodology as the 2007 IMD with data updates where available. The findings from the 2010 IMD for Telford and Wrekin are:

- Telford and Wrekin is in the top 30% most deprived local authorities in the West Midlands, and in the top 40% most deprived nationally.

- Across Telford and Wrekin there are pockets of nationally significant deprivation. There are 14 Telford and Wrekin SOAs (out of a total 108) ranked within the top 10% most deprived nationally (areas of Woodside, Malinslee, Cuckoo Oak, Brookside, Hadley & Leegomery, Dawley Magna, College and Donnington) an increase from six SOAs in the 10% most deprived in 2007.

- The most deprived wards are Woodside and Malinslee. All of Woodside’s five SOAs rank in the 20% most deprived nationally as do three of the four SOAs in Malinslee.

- The more deprived areas are typically concentrated in the urban areas of the Borough, often around the new town estates. The exception to this is the ‘Barriers to Housing and Services’ domain for which the areas with the greatest level of deprivation are in the rural area.

- At the other end of the scale there are eight SOAs within the Borough which rank in the 10% least deprived nationally (areas of Priorslee, Shawbirch, Apley Castle, Newport North, Ercall, Newport West) a slight increase from seven in 2007.

- Of the seven domains, Education, Skills & Training ranks the greatest number of SOAs in the 20% most deprived nationally – 41, over a third of SOAs, with 22 of these in the 10% most deprived. In total, these 41 SOAs represent 38% of the Borough’s population.

- Within the ‘Health Deprivation and Disability’ domain some areas of the Borough have become considerably less deprived with the highest rank now 30,204 (out of 32,482, 8% least deprived) compared to 26,488 in 2007 (19% least deprived). However improvement has not been seen at the most deprived end of the scale resulting in a widening of the gap.

- The income deprivation affecting children index shows that 10,200 children (aged 0-15) across the Borough live in areas ranked in the 20% most deprived nationally, almost a third (31%) of the Borough’s child population.

- The income deprivation affecting older people index shows 6,600 older people (65+M/60+F) within the Borough living in areas ranked in the 20% most deprived nationally, almost a quarter (24%) of the Borough’s older population.

- Levels of deprivation across the Borough have increased with 13% of the population living in the 10% most deprived areas nationally in 2010 compared to 5% in 2007. Overall the changes in the 2010 profile for the Borough suggest that inequality has increased since 2007.
2 INTRODUCTION

First published by the Government in 2000, the Index of Multiple Deprivation (IMD) ranked local authority wards by their level of deprivation. The Index was developed to use SOAs and was updated for 2004, 2007 and again most recently for 2010. The Index has been used primarily by Government for resources allocation based on ‘community need’ and as a means to understand whether policy and service developments have ‘narrowed the gap’ between the most and least deprived communities of England.

The 2010 Index uses the same methodology as in 2007 allowing for some comparison, however there are some important points to consider. The IMD gives areas a rank based on their deprivation compared to other areas in England, therefore where an area’s ranking is lower than in 2007 this indicates the area is more deprived in comparison to other areas in England, it does not necessarily indicate a change in the areas individual circumstances.

The IMD 2010 contains seven domains which relate to income, employment, health deprivation and disability, education skills and training, barriers to housing and other services, living environment and crime. There are also two supplementary indices, income deprivation affecting children and income deprivation affecting older people. The results are published at ‘Super Output Area’ (there are 32,482 Super Output Areas in England, each with a population of around 1,500) together with district level summary result. Full technical details are presented in Appendix 1.

This paper sets out the key results for the Telford and Wrekin as a whole, by SOA and by ward.

3 LOCAL AUTHORITY LEVEL SUMMARY RESULTS

Telford and Wrekin is in the top 30% most deprived districts in the West Midlands (7th out of 30). Nationally the Borough ranks in the top 40% most deprived areas (96th out of 326).

The Borough’s 2010 local authority rankings are not directly comparable with the 2007 Indices due to a reduction in the number of local authorities ranked. However considering Telford and Wrekin’s percentile position within England the summary measures are similar to the 2007 positions.

4 LOCAL LEVEL RESULTS

4.1 Overall Index

The Borough of Telford and Wrekin has several areas of nationally significant deprivation.

- There are 14 SOAs in the top 10% most deprived in England, more than twice the amount in 2007. Around 13% of the Borough’s population live within these areas some 20,600 people.

- A further 12 SOAs are ranked in the 10-20% most deprived areas nationally representing a further 11% of the population of the Borough, 18,000 people.

- Overall 38,600 people within Telford and Wrekin are living in the 20% most deprived areas in England, around a quarter (24%) of the Borough’s total population.

- The most deprived SOA in the Borough is located in Woodside and is ranked in the top 3% most deprived areas in England.

- In 2007 there were six SOAs in the 10% most deprived nationally, this has more than doubled with 14 SOAs now ranking in the 10% most deprived areas of England. Five of these areas are within wards that previously did not fall within the 10% most deprived; Cuckoo Oak, Hadley & Leegomery, Dawley Magna, Donnington.

- The number of people within Telford and Wrekin living in the 10% most deprived areas nationally has increased considerably since 2007 from 8,600 (5% of the population) to 20,600 (13% of the population).

- In 2007 the most deprived SOA in the Borough was ranked at 805 (1 being most deprived), this has shown some improvement in 2010 with a lowest rank of 903. However the gap between the most and least deprived areas in Telford and Wrekin has widened from a range of 31,248 in 2007 to 31,341 (an increase of 93).

Due to the diverse nature of the Borough there are also several areas of low deprivation, considered to be amongst the least deprived areas within England:
There are eight SOAs within Telford and Wrekin that rank in the 10% least deprived areas in England, similar to the number in 2007. Around 13,300 people live within these areas, 8% of the Borough’s population.

A further seven SOAs are ranked in the 10-20% least deprived areas nationally, representing a further 6% of the Borough’s population, 10,000 people.

In total 23,300 people in Telford and Wrekin live in areas within the 20% least deprived nationally, around 14% of the Borough’s population.

The least deprived SOA in Telford and Wrekin is located in Priorslee and is ranked in the top 1% least deprived areas in England.

In 2007 there were seven SOAs in the 10% least deprived, 2010 has seen a slight increase with eight, two of these SOAs are in wards that previously did not rank in the 10% least deprived; Ercall, Newport West.

The number of people in Telford and Wrekin living in the 10% least deprived areas nationally in 2010 has increased from 2007 (13,300 and 12,000 respectively).

</tr>
</tbody>
</table>

Overall the changes in the 2010 profile for the Borough suggest inequality has increased since 2007.

This inequality across the Borough can be clearly seen in Figure 1. The more deprived areas of the Borough are located around the urban areas and new town estates, with the rural edges of the Borough tending towards the less deprived end of the scale.

Inequality across the Telford and Wrekin continues throughout six of the seven domains of the index with the exception of the ‘living environment’ domain with just one SOA within the Borough ranked higher than 40%-50% most deprived.

4.2 Income Deprivation Domain

- Within the Income deprivation domain the more deprived areas of the Borough are once again around the urban areas of Telford in a similar picture to the overall IMD.

- There are 15 SOAs within Telford and Wrekin ranked in the 10% most deprived in England for income. Some 21,800 people within Telford and Wrekin live in these areas, 14% of the Borough’s population.

- A further 13 SOAs in Telford and Wrekin are ranked in the 10-20% most deprived areas nationally. The population of these SOAs is 20,000, 12% of the Borough’s population.

- Overall, 41,800 people in Telford and Wrekin live within the 20% most income deprived areas nationally, just over a quarter of the Borough’s population (26%).

- The most income deprived SOA in the Borough is located in Brookside and is ranked within the top 3% most deprived nationally.

- There are five SOAs ranked in the 10% least income deprived nationally. The areas are home to around 8,400 people, 5% of the Borough’s population.

- A further seven SOAs are ranked in the 10-20% least deprived nationally for income. The population of these areas is around 11,200 people, 7% of the Borough’s population.

- In total 19,500 people in Telford and Wrekin live in areas ranked 20% least deprived for income, some 12% of the total population.

- The least income deprived SOA in Telford and Wrekin is in Priorslee and is ranked within the 1% least deprived nationally.

- The number of people within the Borough living in the 10% most deprived areas nationally has increased since 2007 from 17,900 (11% of the population) to 21,800 (14% of the population).

- Despite some improvement in rankings at the most deprived end of the scale, the overall picture in Telford and Wrekin for the income domain shows an increase in nationally comparative deprivation levels.

4.3 Employment Deprivation Domain

- There are 16 SOAs within the Borough ranked in the 10% most deprived nationally for the employment deprivation domain, around 14,100 people of working age live in these areas, 14% of the working age population.

- An additional 18 SOAs in Telford and Wrekin are ranked in the 10-20% most deprived nationally with 15,900 people of working age living there, 16% of the working age population.

- In total 30,000 people of working age in Telford and Wrekin living within the 20% most deprived areas nationally for employment, just under a third (30%) of the Borough’s working age population, a considerable increase from 20,300 people (21%) in 2007.

- When considering employment, the most deprived SOA in the Borough is located in Brookside and is ranked in the 2% most deprived nationally.

- There are four SOAs ranked in the 10% least deprived nationally for employment. These areas represent 5% of the working age population, some 5,400 people.

- An additional six SOAs are ranked in the 10-20% least deprived nationally for employment, home to 6% of the Borough’s working age population, around 5,700 people.

- Overall, 11,100 people in Telford and Wrekin are living in the 20% least deprived areas nationally for Employment, around 11% of the working age population.

- The least deprived SOA for Employment in the Borough is in Priorslee and is ranked within the 2% least deprived nationally.

- In 2007 the lowest ranked SOA in the Borough for employment had a rank of 1,751 (1 being most deprived), employment deprivation has seen considerable increase within Telford and Wrekin with a lowest rank in 2010 of 640.

4.4 Health Deprivation and Disability Domain

- Within the health deprivation & disability domain, there are four SOAs in the top 10% most deprived areas in England with around 5,700 people living in these areas, 4% of the Borough’s population.

- A further 23 SOAs are ranked in the 10-20% most deprived, representing 34,800 people within the Borough, some 22% of the population.

- A total of 40,500 residents of Telford and Wrekin are living in areas ranked in the 20% most deprived nationally for health and disability, a quarter (25%) of the population. This is an increase from 37,300 people in 2007 (23%).

- The most deprived SOA in the Borough for health deprivation and disability is located in Malinslee and is ranked in the 6% most deprived nationally.

- Just one SOA within Telford and Wrekin is ranked in the 10% least deprived with 1% of the population, 1,800 people living there.

- A further three SOAs are ranked in the 10-20% least deprived, representing an additional 5,700 people 4% of the population.

- Overall 7,500 people within the Borough are living in the 20% least deprived areas nationally for health deprivation, some 5% of the population.

- In 2007 the range of ranks for health deprivation and disability (the difference between most and least deprived SOAs in the Borough) was 24,615. In 2010 the gap between the most and least deprived SOAs in Telford and Wrekin has increased for health deprivation and disability to 28,338 (an increase of 3,723)

4.6 Barriers to Housing and Services Domain

- The barriers to housing and services domain gives a different picture of the Borough compared to other domains with the rural areas also experiencing high levels of deprivation.

- Within the barriers to housing and services domain there are four SOAs ranked in the 10% most deprived nationally representing 4% of the Borough’s population, some 4,200 people.

- A further seven SOAs are ranked in the 10-20% most deprived nationally. Some 7% of the population live within these areas, 11,500 people.

- In total, **17,700 people within Telford and Wrekin live in the 20% most deprived areas nationally for barriers to housing and services**, around 11% of the Borough’s population. This is a considerable increase from 2007 when 10,000 people in Telford & Wrekin were living in areas ranked 20% most deprived, 6% of the population.

- The most deprived SOA in the Borough is located in Edgmond and is ranked in the 3% most deprived nationally.

- There are four SOAs in the Borough ranked within the 10% least deprived nationally, representing around 5,200 people or 3% of the population of Telford and Wrekin.

- Telford and Wrekin has an additional 13 SOAs that rank within the 10-20% least deprived nationally. Some 18,400 people live within these areas, 11% of the Borough’s population.

- Overall, **23,600 people in Telford and Wrekin live in areas ranked in the 20% least deprived nationally**, 15% of the Borough’s population.

- The least deprived SOA in the Borough for barriers to housing and services is in Park and is ranked in the 1% least deprived areas nationally.

- **The number of people within Telford and Wrekin living in the 10% most deprived areas nationally has decreased slightly since 2007** from 6,900 (4% of the population) to 6,200 (4% of the population).

- In 2007 the lowest ranked SOA in the Borough was ranked at 1,199 (1 being most deprived), **comparative deprivation has increased by 2010** with a lowest rank of 780. The gap between the most and least deprived areas of the Borough has increased since 2007 by 387 ranks.

4.8 Living Environment Deprivation Domain

- The Living environment domain considers where people are living including the quality of housing, central heating, air pollution and road safety for pedestrians. This domain shows Telford and Wrekin at its least deprived of all the domains.

- **There are no SOAs that rank in the 10% most deprived nationally, and no SOAs that rank in the 10-20% most deprived nationally for living environment deprivation.**

- Just six SOAs rank in the 50% most deprived areas nationally, 5% of the Borough’s population or 8,600 people, an increase since 2007 when 5,700 people (4% of the population) lived in areas in the 50% most deprived nationally.

- The **most** deprived SOA in the Borough is located in Newport West and is ranked in the 37% most deprived areas nationally.

- There are 28 SOAs in Telford and Wrekin that rank in the 10% least deprived nationally for living environment. Some 43,000 people live within these areas, 26% of the population.

- An additional 25 SOAs rank in the 10-20% least deprived nationally, representing 23% of the Borough’s population or 36,900 people.

- In total some 79,900 people in Telford and Wrekin live in areas ranked in the 20% least deprived nationally, almost half (49%) of the Borough’s population.

- The **least** deprived SOA in Telford and Wrekin is located in Priorslee and is ranked 32,471 out of 32,482 (32482 being least deprived), in the 1% least deprived nationally.

- In 2007 the lowest rank for living environment was 13,687 (1 being most deprived). In 2010 living environment deprivation in Telford and Wrekin has increased (compared to the national picture) with a lowest rank of 11,964 (a difference of 1723). The least deprived SOA ranking has improved meaning that the gap between the most and least deprived SOAs for living environment has widened by 1735 ranks.

4.10 Income Deprivation Affecting Older People Index

- There are seven SOAs within Telford and Wrekin that rank in the 10% most deprived nationally for income deprivation affecting older people. Around 1,700 older people (65+M/60+F) live within these areas, 6% of Telford and Wrekin’s older people population.

- A further 22 SOAs rank in the 10-20% most deprived, representing 18% of the older population, 4,900 people.

- In total, 6,600 older people (65+M/60+F) in Telford and Wrekin live in areas ranked in the 20% most deprived nationally for income deprivation affecting older people, almost a quarter (24%) of the Borough’s population of older people.

- The most deprived SOA in Telford and Wrekin for income deprivation affecting older people is located in Malinslee and is ranked in the 7% most deprived areas nationally.

- Four SOAs in Telford and Wrekin are ranked in the 10% least deprived nationally for income deprivation affecting older people. Around 1,100 older people (65+M/60+F) live within these areas, 4% of Telford & Wrekin’s older people population.

- A additional eight SOAs in the Borough are ranked in the 10-20% least deprived nationally for income deprivation affecting older people. Around 2,000 older people live within these areas, 7% of Telford and Wrekin’s older people population.

- Overall, 3,100 older people (65+M/60+F) in Telford an Wrekin live in areas ranked in the 20% least deprived nationally for income deprivation affecting older people, 11% of the Borough’s older people population.

- The least deprived SOA in Telford and Wrekin is located in Priorslee and is ranked in the 6% least deprived areas nationally.

- Since 2007 income deprivation affecting older people in Telford and Wrekin has seen some improvement with a narrowing of the gap between the most and least deprived areas. In 2007 the range of ranks between the most and least deprived SOAs in the Borough was 28,998, in 2010 this has fallen to 28,632 a reduction of 366.

</tbody>
</table>

(a) Working age population (18 – 59F/64M)  (b) 0-15 population  (c) 60+F/65+M

For five of the seven domains, both supplementary indices and the overall index the number of people in Telford and Wrekin living in areas ranked in the 20% most deprived has increased since 2007. The crime domain is the only one to have seen a decrease in the population living in the 20% most deprived areas.

Four of the seven domains, both supplementary indices and the overall index have also seen a reduction in the number of people living in areas ranked in the 20% least deprived nationally. The number of people living in areas ranked in the 20% least deprived for health deprivation and disability has more than tripled since 2007.

4.12 Ward Analysis

Looking at the number and percentage of SOAs in each ward that rank within the 20% most deprived we can consider the deprivation of the ward overall. In this way Woodside was found to be the most deprived ward, with all of its 5 SOAs in the top 20% most deprived nationally.

13 wards within the Borough have at least one SOA ranked within the 20% most deprived nationally, over al third of Telford and Wrekin wards.
Another way to consider the deprivation of an overall ward is to average the ranks of its SOAs to give the ward a rank of its own. This is shown in table 12, where ward averages have been obtained by weighting the SOA ranks by population and then averaging (employment domain is weighted by working age population, Income Deprivation Affecting Children Index by 0-15 population and Income Deprivation Affecting Older People Index by 60+F/65+M, all other domains are weighted by total population). The ranks are then coloured red if they would rank in the top 10% most deprived and yellow for the top 10-20% most deprived (based on 32482 SOAs).

In this way no ward ranks in the 10% most deprived nationally for the overall IMD, with Woodside, Malinslee and Donnington in the top 10-20% most deprived. Woodside and Malinslee are shown to be the most deprived wards in Telford and Wrekin, ranking in the 20% most deprived areas for five out of the seven domains, and both sub-domains.

5 APPENDIX 1: TECHNICAL DEFINITIONS

5.1 Super Output Areas

Super Output Areas (SOAs) are a geography from the Office for National Statistics. They were specifically designed for the collection and publication of small area statistics to avoid the problems of inconsistency and instability often associated with statistics collected for electoral wards. There are 3 layers of SOAs; lower, middle and upper. The IMD is published at the Lower Layer, where SOAs have populations of around 1,500 and are nested into ward boundaries.

5.2 District Level Summary Measures

The ID 2010 does disclose measures at the district level; however districts are difficult to describe as a whole or to compare for several reasons:

- Districts can vary greatly in population size.
- Some districts may have a more “mixed” population containing greater variations in deprivation whereas other areas may have more concentrated deprivation rather than being evenly spread across the authority.

The ID 2010 has 6 district level summary measures that take into account these issues and focus on different aspects of multiple deprivation. These are:

- **Average Score** – Population weighted average of the combined scores for the LSOAs in a district.
- **Average Rank** – Population weighted average of the combined ranks for the LSOAs in a district
- **Extent** - This measure looks at the proportion of the district’s population living in the most deprived SOAs in England.
- **Local Concentration** – Population weighted average of the ranks of a district’s most deprived LSOAs that contain exactly 10% of the districts population
- **Income Scale** - This measure is a count of people in the district who experience income deprivation.
- **Employment Scale** - This measure is a count of people in the district who experience employment deprivation.

5.3 Local Level Results – Domains and Indicators
5.3.1 Income Deprivation Domain

- Adults and children in Income Support families.
- Adults and children in Income Based Job Seekers Allowance families.
- Adults and children in Pension Credit (Guarantee) families.
- Adults and children in Child Tax Credit families (who are not claiming for IS, Income-based JSA, Pension Credit or Working Tax Credit) whose equivalised income (excluding housing benefits) is below 60 per cent of the median before housing costs.
- Asylum seekers in England in receipt of subsistence support, accommodation support, or both.

The combined count of income deprived individuals per LSOA forms the numerator of an income deprivation rate which is expressed as a proportion of the total LSOA population.

5.3.2 Employment Domain

- Claimants of Jobseekers Allowance (both contribution-based and income-based): men aged 18-64 and women aged 18-59
- Claimants of Incapacity Benefit: men aged 18-64 and women aged 18-59.
- Claimants of Severe Disablement Allowance: men aged 18-64 and women aged 18-59.
- Participants in the New Deal for the 18-24s who are not in claiming JSA.
- Participants in the New Deal for 25+ who are not in claiming JSA.
- Participants in the New Deal for Lone Parents aged 18 and over (after initial interview).

The combined count of employment deprived individuals per LSOA forms the numerator of an employment deprivation rate which is expressed as a proportion of the working age population (women aged 18-59 and men aged 18-64) in the LSOA.

5.3.3 Health Deprivation and Disability Domain

- Years of Potential Life Lost (YPLL)
- Comparative Illness and Disability Ratio (CIDR).
- Measures of acute morbidity, derived from Hospital Episode Statistics.
- The proportion of adults suffering from mood or anxiety disorders

5.3.4 Education, skills and Training Deprivation Domain

Sub Domain: Children/young people

- Key Stage 2 attainment. The average points score of pupils taking English, maths and science.
- Key stage 3 attainment. The average points score of pupils taking English, maths and science.
- Key stage 4 attainment. The average capped point score of pupils taking KS4 exams.
- Proportion of young people not staying on in school or non advanced education above the age of 16.
- Secondary school absence rate
- Proportion of those aged under 21 not entering higher education
Sub Domain: Skills
- Proportions of working age adults (aged 25-54) in the area with no or low qualifications.

5.3.5 Barriers to Housing and Services Domain

Sub Domain: Wider Barriers
- Household overcrowding.
- The rate of acceptances for housing assistance under the homelessness provisions.
- Difficulty of Access to owner-occupation

Sub Domain: Geographical Barriers
- Road distance to GP premises.
- Road distance to a food store.
- Road distance to a primary school.
- Road distance to a Post Office or sub post office.

5.3.6 Living Environment Deprivation Domain

Sub Domain: The ‘indoors’ living environment
- Social and private housing in poor condition.
- Houses without central heating.

Sub Domain: The ‘outdoors’ living environment
- Air quality.
- Road traffic accidents involving injury to pedestrians and cyclists.

5.3.7 Crime and Disorder Domain

- Burglary.
- Theft.
- Criminal damage.
- Violence.

5.4 Local Level Results – Supplementary Indices

5.4.1 Income Deprivation Affecting Children Index

This is a subset of the Income Domain and shows the proportion of children aged 0-15 living in income deprived households.

5.4.2 Income Deprivation Affecting Older People Index

This is a subset of the Income Domain. It shows the proportion of older people aged 60 and over living in income deprived households.
6 APPENDIX 2 – BOX PLOTS FOR ALL DOMAINS 2010 and 2007

Box plots allow an easy visual comparison of the two most recent IMD scores for SOAs in Telford and Wrekin. A box plot consists of a central ‘box’ or rectangle with two lines or ‘whiskers’ either side. The line in the centre of the box is the median rank of SOAs in Telford and Wrekin, where this falls below the heavy blue line (showing the England median) Telford and Wrekin is more deprived than the national average. The box shows the 25th and 75th percentile of ranks giving an indication of the spread of ranks around the median. The ‘whiskers’ either side show the minimum and maximum ranks received by SOAs in Telford and Wrekin, the distance between these two end points shows the range of ranks in the Borough indicating the gap between the most and least deprived SOAs. A rank of 1 is most deprived, so scores low on the chart are more deprived than those towards the top.
