

# Ward Health Profile 2014: Newport East

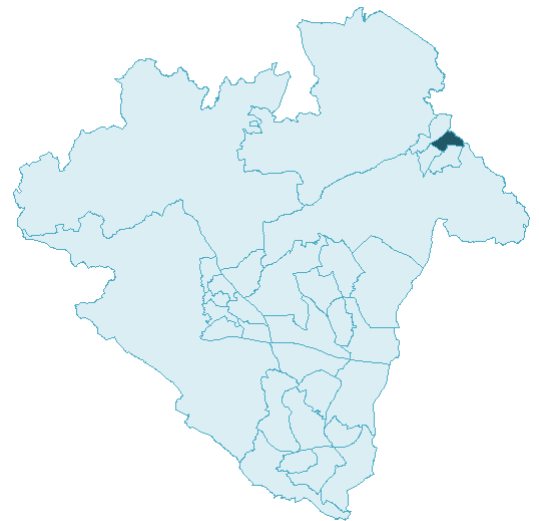

## Overview

• The health of people who live in Newport East Ward is generally better than the average for Telford & Wrekin and England as a whole. The chart below summarises how Newport East compares with England in 52 Public Health England Local Health Indicators.

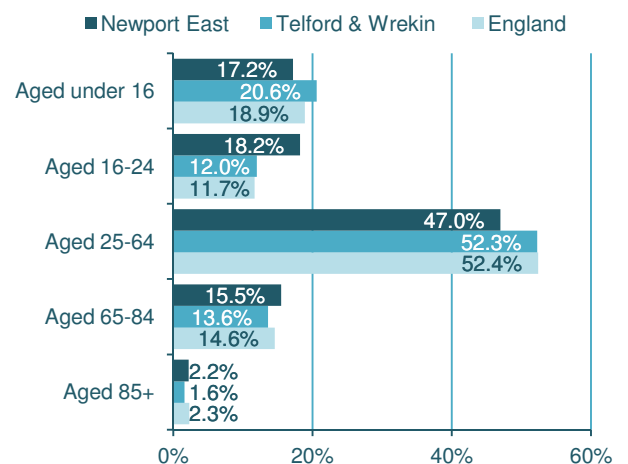

\* not compared = 1 (2%)  
(see page 4 for full list of indicators)

- The proportion of people aged 16-24 and 65-84 in the ward is higher than the average for Telford & Wrekin and for England.
- Life expectancy for men and women is better than the average for Telford & Wrekin.
- Newport East is one of the less deprived wards in the borough. Levels of income deprivation and the proportion of children under 16 living in poverty in Newport East are significantly better than the England average.
- The emergency hospital admission rate for all causes and for chronic obstructive pulmonary disease (COPD) is better than the England average. The admission rate for all causes is the sixth best in the borough and the seventh best for COPD.
- The rate of hospital admissions for alcohol related harm in Newport East is better than the England average and is the fourth best rate in Telford & Wrekin.
