McPhillips (Wellington) Ltd	Mr Peter McPhillips	McPhillips (Wellington) Ltd Horton House Hortonwood 50 Hortonwood Telford Shropshire TF1 7FG	Support		07/07/2016	The continued growth of Telford requires the tools to undertake the works , the proposal to have an inert disposal point within 5 miles of NE Telford is a welcome thought, there is effectively no inert waste site in Telford that is competitively priced , and we as contractors are taking material up to 25 miles away , more road traffic , pollution and miles on roads and trucks . Notwithstanding the thought of a sand and gravel pit locally to support the proposed infrastructure must be a positive.

Dear Mr Kaul

Application number: TWC/2016/0437

I write in support of the proposed Pave Lane Quarry. We provide a lorry and digger service to local builders and farmers around the Telford/Newport area. My wife and I have been operating this business for many years.

Currently any inert material has to go to Shrewsbury, Cannock or Wombourne area, all over 25 miles away. This extra cost for this distance has to be passed onto our customers.

Likewise any sand and gravel required has to be collected from Rugeley, again over 20 miles away.

We fully support the application to enable our carbon footprint to be reduced along with a more cost effective solution for our customers.

A Pave Lane permission would protect our existing job and we think would be a 'common sense' support for the Telford and Wrekin area which is growing so fast.

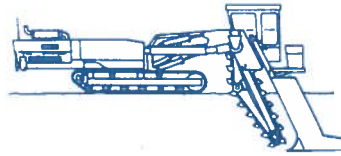

Yours sincerely

George Lawrence

Re.Planning Ref: TWC/2016/0437

Dear Sir/Madam

I would like to take this opportunity to express my support for the above planning application re the proposed Pave Lane Quarry.

As drainage & groundwork contractors in the surrounding area to the proposed quarry, we often have difficulty in securing supplies of clean gravels for land drainage schemes, as we use a considerable amount, as a consequence we have to pay excessive haulage costs to import gravels from further afield.

I feel the proposed quarry would also serve the local communities with a much needed local resource for future developments, & I would strongly wish to add my support to the proposal.

Yours faithfully

G.R.Hill.
