

PUBLIC HEALTH OUTCOMES FRAMEWORK (PHOF): Telford & Wrekin Update Report, February 2017

Introduction

The Public Health Outcomes Framework (PHOF) for England¹, was first published in January 2012 by Public Health England (PHE). The overarching vision of the PHOF is improving and protecting the nation's health and wellbeing, and improving the health of the poorest fastest. This vision is encompassed in the framework's two high level outcomes:

- **Outcome 1:** Increased healthy life expectancy
- **Outcome 2:** Reduced differences in life expectancy and healthy life expectancy between communities

The framework aims to deliver these outcomes through improvement across 63 public health indicators and a series of sub indicators grouped into five domains.

Purpose

PHE refresh and update the data the PHOF indicators at quarterly intervals in August, November, February and May. This report provides an updated overview and key headlines for Telford & Wrekin from the most recent PHOF, comprising updates released by PHE in February 2017

Key Headlines for Telford & Wrekin (February 2017)

Summary tables of all the PHOF indicators are included in the Appendix 1.

New or updated indicators showing improvement

- The **percentage of Year 1 pupils with free school meal status achieving the expected level in the phonics screening check**, although showing a very slight increase (71% to 72%) is now rated similar to the England average where previously it was rated better.
- **Cancer screening coverage for bowel cancer** has seen a statistically significant improvement from 53.9% to 56.3% of the eligible population screen adequately, however this indicator remains worse than the national average.
- The **percentage of male children with free school meal status achieving a good level of development at the end of reception** has improved from 39.7% in 2014/15 to 45.1% in 2015/16. This indicator remains similar to the national average.
- The **gap in female life expectancy between Telford and Wrekin and England as a whole** has narrowed from -1.29 to -1.12. This indicator is showing improvement for the second period in a row, but remains worse than the national.

New or updated indicators showing deterioration

- The **percentage of female Year 1 pupils with free school meal status achieving the expected level in the Phonics screening check** has decreased slightly from 79% in 2014/15 to 77% in 2015/16, this has resulted in a change in rating from better to similar to the England average.
- **Child excess weight in 4-5 year olds** has increased with 25.5% of 4-5 year olds measuring overweight or obese in 2015/16 compared to 23.4% in 2014/15. This indicator is now worse than the national average for the first time in five years.

¹ <https://www.gov.uk/government/publications/healthy-lives-healthy-people-improving-outcomes-and-supporting-transparency>

- There has been a reduction in **Abdominal Aortic Aneurysm Screening Coverage** with 78.8% of eligible men conclusively tested in 2015/16 compared to 83.4% in 2014/15. This has resulted in a change of rating for this indicator, from better than the England average to similar.
- **Health related quality of life for older people** has seen a slight decline with the average health status score for adults aged 65 and over decreasing from 0.72 in 2014/15 to 0.71 in 2015/16. This decline has resulted in a change in rating from similar to worse than the England average.
- The **proportion of dependent children under 20 living in low income families** has seen an increase from 22.0% in 2013 to 22.9% in 2014. Although this increase is slight, it is statistically significant, this indicator remains worse than the national average.
- **Cervical cancer screening** has seen a decline with the percentage of eligible women adequately screen decreasing from 74.7% in 2015 to 73.7% in 2016. Although this percentage change is small it is a statistical difference. This indicator remains better than the national average.
- **Population vaccination coverage for MMR for two doses (5 years old)** has seen a statistically significant decrease from 94.0% in 2014/15 to 91.6% in 2015/16. This indicator remains similar to the national average.
- The **gap in male life expectancy between Telford and Wrekin and England as a whole** has increased from -0.86 for 2012-14 to -1.10 for 2013-15. This indicator had previously been showing improvement since 2010-12, but has remained worse than the national since 2005-07.

Change in new and updated indicators with no RAG rating

- There has been a statistically significant decrease in the **percentage of those aged 70 who have been vaccinated for shingles** from 58.7% in 2014/15 to 50.7% in 2015/16.

New Indicators and sub-indicators

There has been one new sub-indicator included in the PHOF since the last update in November 2016:

- **Adjusted antibiotic prescribing in primary care by the NHS** – Annual total number of prescribed antibiotic items per STAR-PU (Specific Therapeutic group Age-sex weightings Related Prescribing Unit). With a figure of 1.09 Telford and Wrekin is performing better than the national average of 1.10.

PHOF Summary for Telford & Wrekin, February 2016

Domain 0 – Overarching Determinants of Health

There are two primary indicators with a total of 12 sub-indicators in this domain with reported data. There were no new sub-indicators for this domain.

Eight indicators have been updated in the February 2017 release.

- Healthy life expectancy at birth (male, female)
- Life expectancy at birth (male, female)
- Life expectancy at 65 (male, female)

Gap in life expectancy at birth between each local authority and England as a whole (male, female)

The Telford & Wrekin position is significantly worse than the England average for all eight sub-indicators that have been compared.

Worse than average indicators:

- Healthy life expectancy at birth (male, female)
- Life expectancy at birth (male, female)
- Life expectancy at 65 (male, female)

Gap in life expectancy at birth between each local authority and England as a whole (male, female)

Domain 1 – Wider Determinants of Health

There are 17 primary indicators with 51 sub-indicators with reported local data in this domain.

There have been no new indicators in the February 2017 update.

A total of 19 indicators have been updated since the last release:

- Children in low income families (under 20, under 16)
- School Readiness: the percentage of children achieving a good level of development at the end of reception (Persons/male/female, free school meal persons/male/female)
- School Readiness: the percentage of Year 1 pupils achieving the expected level in the phonics screening check (Persons/male/female, free school meal persons/male/female)
- Sickness absence - the percentage of employees who had at least one day off in the previous week
- Sickness absence - the percent of working days lost due to sickness absence
- Killed and seriously injured (KSI) casualties on England's roads
- Re-offending levels - percentage of offenders who re-offend

- Re-offending levels - average number of re-offences per offender

The Telford & Wrekin position is significantly worse than the England average for five sub-indicators and significantly better for nine sub-indicators

Better than average indicators:

- School Readiness: the percentage of Year 1 pupils achieving the expected level in the phonics screening check (Persons, male, female)
- Killed and seriously injured (KSI) casualties on England's roads
- Violent crime (including sexual violence) - hospital admissions for violence
- The rate of complaints about noise
- Statutory homelessness - households in temporary accommodation
- Fuel poverty
- Social isolation: percentage of adult social care users who have as much social contact as they would like

Worse than average indicators:

- Children in low income families (under 20, under 16)
- First time entrants to the youth justice system
- 16-18 year olds not in education employment or training
- Social isolation: percentage of adult carers who have as much social contact as they would like

Domain 2 – Health Improvement

There are 23 primary indicators with 61 sub-indicators with reported local data in this domain.

There have been no new indicators in the February 2017 update.

A total of 13 indicators have been updated since the last release:

- Child excess weight (4-5 year olds, 10-11 year olds)

Hospital admissions caused by unintentional and deliberate injuries in children (aged 0-14, aged 0-4, aged 15-24)

Average difficulties score for all looked after children aged 5-16 who have been in care for at least 12 months on 31st March

Cancer screening coverage – (breast cancer, cervical cancer, bowel cancer)

Self-reported wellbeing – (low satisfaction, low worthwhile, low happiness, high anxiety)

Self-reported wellbeing - people with a low worthwhile score-Persons

Overall, Telford & Wrekin is significantly better than the England average in 18 of the sub-indicators and significantly worse in 18.

Better than average indicators:

- Proportion of children aged 2-2½yrs offered ASQ-3 as part of the Healthy Child Programme or integrated review

- Smoking prevalence at age 15 – (current smokers, regular smokers, occasional smokers)
- Successful completion of drug treatment - non-opiate users-Persons
- Cancer screening coverage – (breast cancer, cervical cancer)
- Newborn Blood Spot Screening - Coverage
- Newborn Hearing Screening - Coverage
- Injuries due to falls in people aged 65 and over (Persons/male/female, aged 65-79 persons/male/female, aged 80+ persons/male/female)

Worse than average indicators:

- Breastfeeding – (initiation, prevalence at 6-8 weeks current method, prevalence at 6-8 weeks historical method)
- Smoking status at time of delivery
- Under 18 conceptions
- Child excess weight (4-5 year olds, 10-11 year olds)
- Hospital admissions caused by unintentional and deliberate injuries in children (aged 0-14 years, aged 0-4 years)
- Average number of portions of fruit consumed daily (adults)
- Average number of portions of fruit consumed daily at age 15
- Average number of portions of vegetables consumed daily at age 15
- Excess weight in Adults
- Smoking prevalence in adult in routine and manual occupations – current smokers
- Cancer screening coverage - bowel cancer
- Cumulative percentage of the eligible population aged 40-74 offered an NHS Health Check-Persons
- Cumulative percentage of the eligible population aged 40-74 offered an NHS Health Check who received an NHS Health Check-Persons
- Cumulative percentage of the eligible population aged 40-74 who received an NHS Health check-Persons

Domain 3 – Health Protection

There are seven primary indicators with 26 sub-indicators that have reported local data in this domain.

There has been one new indicator in the February 2017 update.

- Adjusted antibiotic prescribing in primary care by the NHS-Persons

A total of 12 indicators have been updated since the previous release.

- Fraction of mortality attributable to particulate air pollution
- Population vaccination coverage – (Dtap / IPV / Hib (1 year old), Dtap / IPV / Hib (2 years old), MenC, PCV, Hib / MenC booster (2 years old), Hib / Men C booster (5 years old), PCV booster, MMR for one dose (2 years old), MMR for one dose (5 years old), MMR for two doses (5 years old), Shingles vaccination coverage (70 years old))

The Telford & Wrekin position is significantly better than the England average for 10 of the sub-indicators and significantly worse for three.

Better than average indicators:

- Population vaccination coverage - Dtad / IPV / Hib (1 year old)-Persons
- Population vaccination coverage - Dtad / IPV / Hib (2 years old)-Persons
- Population vaccination coverage – MenC - Persons
- Population vaccination coverage - PCV-Persons
- Population vaccination coverage - PCV booster-Persons
- Population vaccination coverage - MMR for one dose (2 years old)-Persons
- Population vaccination coverage - MMR for one dose (5 years old)-Persons
- Population vaccination coverage - MMR for two doses (5 years old)-Persons
- Population vaccination coverage – HPV vaccination coverage for one doe (females 12-13 years old)
- Incidence of TB-Persons
- Adjusted antibiotic prescribing in primary care by the NHS-Persons

Worse than average indicators:

- Population vaccination coverage – Flu (aged 65+)
- Population vaccination coverage – Flu (at risk individuals)
- Population vaccination coverage – Flue (2-4 years old)

Domain 4 – Healthcare and Premature Mortality

There are 16 primary indicators with a total of 63 sub-indicators with reported local data in this domain.

There have been no new indicators in the February 2017 update.

A total of 3 indicators have been updated since the last release.

- Excess under 75 mortality rate in adults with serious mental illness
- Proportion of adults in the population in contact with secondary mental health services
- Health related quality of life for older people

The Telford & Wrekin position is significantly worse than the England average for 15 of the sub-indicators. There is just one local indicator better than the national average.

Better than average indicators

- Mortality rate from a range of specified communicable diseases, including influenza

Worse than average indicators:

- Infant mortality
- Mortality rate from causes considered preventable (persons, female)
- Under 75 mortality rate from cancer (Persons, male)
- Under 75 mortality rate from cancer considered preventable (male)

- Under 75 mortality rate from liver disease (Persons)
- Under 75 mortality rate from liver disease considered preventable (Persons, female)
- Under 75 mortality rate from respiratory disease (Persons, female)
- Under 75 mortality rate from respiratory disease considered preventable (Persons)
- Proportion of adults in the population in contact with secondary mental health services
- Health related quality of life for older people
- Excess winter deaths index (3 years, all ages) - Male

Summary of benchmarked indicators

- **Domain 0: Overarching Determinants of Health** has the greatest proportion of indicators where the Telford & Wrekin position is worse than the England average, with 100% of benchmarked indicators rated red. (*total 8 indicators*)
- **Domain 4: Healthcare and Premature Mortality** is the area where the benchmarked Telford & Wrekin position is closest to the England average. This domain has the highest proportion of indicators that are statistically similar to the England average, with 77% of benchmarked indicators rated amber. (*total 62 indicators*)
- **Domain 3: Health Protection** is the area where Telford & Wrekin has the highest proportion of indicators rated better than the England average, with 79% of benchmarked indicators rated green. (*total 14 indicators*)

Appendix 1

Key to RAG rating

Telford & Wrekin position significantly worse than the England average or goal	Telford & Wrekin position similar to the England average or goal	Telford & Wrekin position significantly better than the England average or goal
--	--	---

The RAG rating in these tables uses the statistical significance as calculated and presented by Public Health England (PHE) in the PHOF release February 2016. Indicators without RAG ratings are those where PHE have not applied statistical comparisons.

Ref	Indicator	Telford and Wrekin	England	Time Period
0.1i Update	Healthy life expectancy at birth-Male	59.54	63.39	2013 - 15
