Subject: Query from the Inspector – 21.6.17
Importance: High

Good afternoon all, please note the following from the Inspector:

Query from the Inspector – 21.6.17

The Council's updated documents are noted. However, can the Council confirm that the revised housing requirement of 17,820 dwellings has been subject to (i) Habitat Regulations Assessment and (ii) traffic modelling? On the second point, the response from Highways England (dated 2.6.17) does not appear to specifically acknowledge that the overall number of houses would increase. Can the Council/HE confirm that the higher dwelling requirement would not have an adverse effect on either the strategic or the local road network?

Please also note that if you are unable to respond by the end of play tomorrow I will be on holiday until 3rd July. I will advise who to progress correspondence with during my absence.

Kind regards

Tina Kelly
