

LOCATION PLAN 1:25000

NOTES

Please note that due to the varying app, scale and accuracy of plan information available, plus projection difficulties, only approximate positions can be shown.

This plan should be read in conjunction with the adjacent mining information grid plans, individual abandonment plans, survey plans, shaft registers, historical maps and geological maps.

The mineshafts shown have been supplied historically by TDC and may be incomplete records. TDC supplied mineshaft information for land they no longer owned and therefore where they held an interest in land, mineshaft information was withheld.

The Coal Authority mineshaft information has only been supplied for land within the World Heritage Site and the immediate surrounding area due to licensing agreements. The Coal Authority have not supplied mineshaft information for the remainder of area.

All information shown is indicative and further investigation in the mining areas is required.

The reader should consult the Coal Authority and all other mineral owners before assessing the impact of past mining on existing or new developments.
