

## Carer's Assessments

### Are you a Carer?

A carer spends regular time providing unpaid support to a relative, partner or friend who is ill, frail, disabled or has a mental health condition or an addiction dependency.

### What is a Carers Assessment?

From April 2015 carers are entitled to an assessment in their own right.

You may be juggling work and care and this is having a big impact on your life. You don't necessarily have to live with the person you are looking after or be caring full time to have an assessment. The person you support does need to live in Telford and Wrekin.

A carer's assessment provides you with the opportunity to identify what information; advice and support will be beneficial to you by reflecting on the following questions.

- Does your caring role affect your ability to carry out any caring responsibilities you have for a child?
- Does your caring role affect your ability to carry out caring responsibilities for another adult outside your caring role?
- Does caring affect your ability to maintain your home and garden?
- Does caring affect your ability to shop and prepare nutritional meals for yourself?
- Do you feel able to develop and maintain family or other personal relationships that are important to you?
- Do you struggle to engage in work, training, education or volunteering?
- Are you able to access facilities in the local community such as leisure centre, shops, attending appointments, post office and pharmacy for example?
- Do you have time to yourself to do the things which are important to you such as social activities; fitness programme, recreational interests and personal development?
- As a consequence of your caring role does this affect your own health and wellbeing?

When the assessment is complete this will give you an idea of what would make a difference and assist you in your caring role. It may be that an individual payment can be accessed to help you to meet those identified needs and aspirations.

The following may be offered to you, depending upon the outcome of your Carers Assessment.

# Fact sheet

Last Review Date: November 2025

## How do I get a Carers Assessment?

Generally this assessment is completed at the same time as the person you are caring for is being assessed. The assessment can be completed on another occasion by a different worker or alternatively you can contact the All Age Carers Centre.

- Contact Family Connect on 01952 385385 (please select option 2 when prompted).
- Alternatively if the person you care for has a Social Worker/Adult Practitioner - you can request an assessment from them.

## Will I have to pay?

The assessment is free and does not take into account your financial situation.

## Assessment reviews

A review happens at least once a year unless your circumstances change or you feel things are not working well.

## What help could I get?

Following your Carers Assessment your Social Worker/Adult Practitioner will discuss what support is available to you. This can be further advice and information, including signposting to other agencies that may be able to help you.

You can have free support, information, advice and guidance from the All Age Carers Centre relating to your caring role.

This can include a referral to the Healthy Lifestyles team. Advisors can support you to make a change to their mental, physical and emotional wellbeing in a free and confidential service. While they are not medically trained, they are well versed on behavioural change and supporting individuals to improve the way they want to live their lives in personalised one to one sessions.

You may also identify that there is something that would help you in your life that would make caring more manageable for you and the person you care for. This may be specific to your circumstances. For example, because of your caring role you find going to the shops difficult and keeping in touch with family and friends. You may wish to purchase a tablet or laptop to help you keep in touch with family and friends and order your shopping online.

You would receive a Carers Personal Budget, as a one-off Carers Direct Payment to help you purchase the tablet or laptop.

Another example maybe you identify from your Carers Assessment that it would be of benefit to you to learn how to drive, to support your caring role. We could provide you with a one-off Direct Payment to support you with the cost of driving lessons.

[To find out more about Direct Payments please see our Direct Payment page.](#)

There may be times when there will be an unexpected emergency situation which requires urgent support. Your Social Worker/Adult Practitioner can discuss with you the Emergency Response Service which is as a preventative measure that will give you peace of mind to individuals when an emergency occurs.
