Apologies:
None

Key Points from discussion on the Learning Disability Engagement:

Leon – if there are people who don't feel safe then should we find a way of making me feel safe?
All members agreed.
We need to understand feeling safe and what we can do to promote Safe Places.

Other areas to consider:

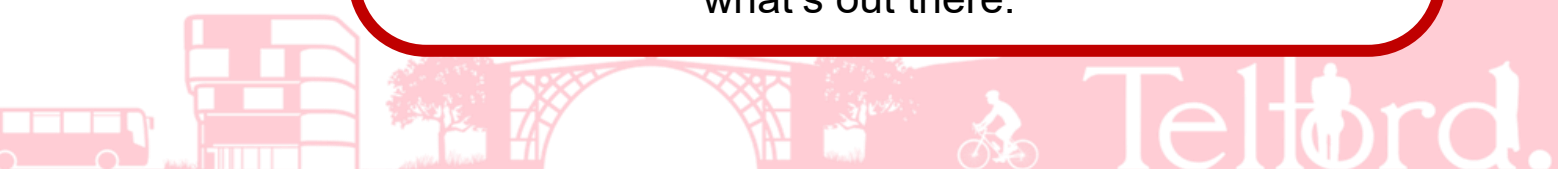

- Make sure support plans include seeing friends
- Consider walking groups

Key Points from discussion on the Training for paid carers:

Leon – in some places things are shabby, and they don't have appropriate training to support people with learning disabilities - understanding and knowledge of learning disabilities and knowing what's out there.

Parent and carers – understanding of behaviours and supporting people's mental health are lacking

Other areas to consider:

Taking to us

And talking to us

A standard across care providers about what they need to do around training, specifically around learning disabilities. This needs to be built into the framework. Involving experts by experience in recruitment and training
Regular feedback on providers is needed to hold them to account

- **ACTION** – Sarah Downes to circulate skills for care guidance
- **ACTION** – Manny to include the feedback into the framework

Any other business:

- **ACTION** - Every member to send Sarah Downes a photo to be used in the meeting notes by 8th December
- **ACTION** – Manny to consider a standard customer satisfaction survey included in the framework

Date of next meeting:
6th January 2021 - 1pm
